

How much does it cost to update your in room guest book? How many tons of paper are wasted?

Why waste money on updating your in-room guest book? With information that is always current, the Tiare GuestBook™ tablet allows guests to: order room service items, request amenities such as extra towels or pillows, browse spa services and schedule appointments and view information for current on premise promotions, shows and activities.

▪ **An Elegant Amenity for the Guest**

The GuestBook is an elegantly wall framed tablet or table mounted device replacing the costly guest

amenity book. Featuring a simple touch-screen interface and proprietary software, the GuestBook provides a guest with an unparalleled service experience. Guests benefit from faster service, greater control over their service, increased convenience and improved personalized attention.

▪ **Update Information in Real Time**

The GuestBook provides the ability to update the information in real time allowing for more efficient management of room service menus. This flexibility allows F&B to take advantage of surplus inventory, remove items that are not moving, and temporarily hide items that may be out of stock. Tired of spending money and time replacing paper tent cards in the guestroom? Real time updating means that information on current promotions, shows or events can be changed with the touch of a button.

▪ **A Valuable Yield Management Tool**

Trying to fill an available spa, show or restaurant opening? The GuestBook can send information out to the guest promoting specific venues, activities and services. Information can be sent to all guests or target specific guests based on guest preferences.

▪ **An Eco Friendly Platform for All Property Information**

The GuestBook displays information for all restaurants, events, spa services and property amenities. The GuestBook allows guests to view the full menu from any onsite restaurant and view a complete list of spa services. Eliminate the printing and distribution costs of a traditional guest book while helping the environment.
